

# VODA's Quality Policy

It is the policy of VODA to maintain a quality system designed to meet the requirements of ISO 9001:2015 in pursuit of its primary objectives, the purpose and the context of the organisation.

It is the policy of VODA to:

- give satisfaction to all of our service users and other stakeholders and interested parties whenever possible, meeting and exceeding their expectations;
- comply with all legal requirements, codes of practice and all other requirements applicable to our activities;
- reduce hazards, prevent injury, ill health and pollution;
- provide all the resources of equipment, trained and competent staff and any other requirements to enable these objectives to be met;
- ensure that all employees are made aware of their individual obligations in respect of this quality policy;
- maintain a management system that will achieve these objectives and seek continual improvement in the effectiveness and performance of our management system based on risk.

This quality policy provides a framework for setting, monitoring, reviewing and achieving our objectives, programmes and targets.

Service user service is an essential part of the quality process and to ensure this is fulfilled, all employees receive appropriate training and guidance to ensure awareness and understanding of quality and its impact on service user service.

To ensure the company maintains its awareness for continuous improvement, the quality system is regularly reviewed by the Quality Assurance Group (QAG) to ensure it remains appropriate and suitable to our business. The Quality System is subject to both internal and external annual audits.
